bootstrap

selinux

— 2025/04/03 08:05

- Rocky Linux 9.5 (2025-04-03)
- Openstack 2024.1 (Caracal)
- kolla-ansible

```
TASK [openstack.kolla.baremetal : Change state of selinux]
*****
*****
*****
An exception occurred during task execution. To see the full traceback, use
-vvv. The error was: ModuleNotFoundError: No module named 'selinux'
fatal: [localhost]: FAILED! => {"changed": false, "msg": "Failed to import
the required Python library (libselinux-python) on osp-caracal's Python
/usr/bin/python3. Please read the module documentation and install it in the
appropriate location. If the required library is installed, but Ansible is
using the wrong Python interpreter, please consult the documentation on
ansible_python_interpreter"}
