Ceph Configuration

Ceph Runtime configuration

```
# ceph daemon {daemon-type}.{id} config show
ex) ceph daemon osd.0 config show
```

```
# ceph daemon {daemon-type}.{id} config get {parameter}
ex) ceph daemon osd.0 config get public_addr
```

Setting a Specific Configuration Setting at Runtime

```
2가
       ceph
  1. Ceph Monitor
  2. Administration Socket
tell
      injectargs
                                                 Ceph
# ceph tell {daemon-type}.{daemon id or *} injectargs --{name} {value} [--
{name} {value}]
ex) ceph tell osd.0 injectargs '--debug-osd 0/5'
  tell
    -{config_opt} {opt-val} 가
                               가
                                                                  가
                                                . daemon
ceph tell
                 monitor
                                                                        가
```

Last update: 2021/08/24 03:03

sudo ceph osd.0 config set debug_osd 0/5
