# docker image save/load export/import

docker build commit  
pull .  
docker registry 가 .  
docker tar .

## docker save (docker image -> tar)

docker tar docker save .

```
$ docker save [ ] < > [ ]
```

```
-o .
```

```
$ docker save -o nginx.tar nginx:latest
```

## docker load (tar -> docker image)

tar docker image docker load

```
$ docker load -i [tar ]
```

## docker export (docker container -> tar)

docker container tar .

```
$ docker export [ or ID] > xxx.tar
```

## docker import (tar -> docker image)

export tar docker image .

```
$ docker import [ or URL] - [image name[:tag name]]
```
