insecure registry

Getting image source signatures

Checking if image destination supports signatures

Error: Copying this image requires changing layer representation, which is not possible (image is signed or the destination specifies a digest)

```
https가 http insecure registry
/etc/containers/registries.conf.d/myregistry.conf
```

```
[[registry]]
```

```
[[registry]]
location = "registry.mycluster.williamlieurance.com:5000"
insecure = true
```

```
[[registry]]
location = "localhost:5000"
insecure = true
```
