Java

Thread Dump Analyzer

OS

OS   stdout   console
                          .   redirection
             .   .

- : `kill -3 [PID]`
- : `Ctrl + Break`

JVM

- jps -v   java
- jstack [PID] (jstack   –F   )
- jcmd [PID] Thread.print (jdk7   )
- jcmd [PID] help   ,
-                                   3~ 4   .

ThreadLogic

https://github.com/sparameswaran/threadlogic

1.   ,   github
2.   UI
3.   load

IBM TMDA (Thread and Monitor Dump Analyzer)

https://www.ibm.com/support/pages/ibm-thread-and-monitor-dump-analyzer-java-tmda

1. IBM   analyzer
2.   UI
3.   UX
4.   lock, block, wait

jVisualVM (JDK)

1.
2. heap dump analyze   (   )

irockel TDA

https://github.com/irockel/tda

1. open source
2. UI   UX
3.   lock, block, waiting
4.   ,   monitor   lock   ,   lock   block, waiting

5.   ,   block, waiting   lock   monitor

WEB

https://gceasy.io/ https://fastthread.io/

1. UI   analyze
2.   , IBM TMDA
3.   upload
