# Kernel Crash Dump

Kdump

```

Linux
kexec
kdump kexec ( )
( )

```

## kdump

### kdump

```
# yum install kexec-tools
```

가 GUI

```
# yum install system-config-kdump
```

### kdump

kdump

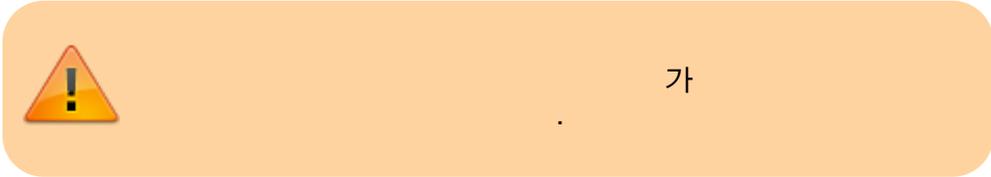

```
kdump crashkernel=
128MB
```

```
crashkernel = 128M
```

```
RHEL7 auto
```

## kdump

```
kdump
```

```
# systemctl is-active kdump
active

# echo 1 > /proc/sys/kernel/sysrq
# echo c > /proc/sysrq-trigger
```

가 /var/crash 가

## Core Dump

GNU (GDB)  
 netdump, diskdump, xendump, kdump.

## Crash

```
yum install crash
```

crash kernel-debuginfo

```
# debuginfo-install kernel
```

## Crash

```
crash /usr/lib/debug/lib/modules/<kernel>/vmlinux \
/var/crash/<timestamp>/vmcore
```
