목차

Migration Bandwidth 변경 3

Migration Bandwidth 변경

```
[vars]
trust_store_path = /etc/pki/vdsm
ssl=true

# Maximum bandwidth for migration, in MiBps, 0 means libvirt's
# default, since 0.10.x default in libvirt is unlimited
# migration_max_bandwidth = 32
migration_max_bandwidth = 100

[addresses]
management_port=54321
```

Note: You can set the migration_max_bandwidth = 1024, as per requirement. However, you also consider capability of network which is used for migration.

3. Restart the vdsmd service.

```
# service vdsmd restart
```
