- Pacemaker가 iSCSI / , LVM 가 PV
- Pacemaker가 iSCSI , / 가
- Pacemaker : iSCSI (iscsi.service blk-availability.service)가
- Pacemaker iSCSI ( )가 가 .

## systemd drop-in unit ( )

Red Hat systemd resource-agents-deps.target drop-in unit 가  
Pacemaker가 iSCSI .

## iscsi ( )

```
# drop-in
mkdir -p /etc/systemd/system/resource-agents-deps.target.d
cat > /etc/systemd/system/resource-agents-deps.target.d/iscsi.conf << EOF
[Unit]
Description=Pacemaker depends on iSCSI
Requires=iscsi.service
After=iscsi.service
EOF
```

## blk-availability (iSCSI + )

```
cat > /etc/systemd/system/resource-agents-deps.target.d/blk-availability.conf << EOF
[Unit]
```

```
Description=Pacemaker depends on block availability (including iSCSI)
Requires=blk-availability.service
After=blk-availability.service
EOF
```

blk-availability.service iscsi.service,  
multipathd.service (RHEL 8/9  
).

```
# systemd
systemctl daemon-reload

#
systemctl list-dependencies resource-agents-deps.target

# Pacemaker (iscsi )
systemctl show -p After pacemaker.service | grep resource-agents
```
