RHEV Self-Hosted Backup/Restore

— *2017/02/15 19:07*

.

Self hosted engine

- Self-Hosted   (Self-Hosted host 1   )
- RHEV-M Backup Data
-

```
0. Global Maintenance mode (          ,                    )

1. rhevm backup
    engine-backup --scope=all --mode=backup --file=BACKUP_FILE --
log=LOG_FILE
2. hosted-engine shutdown
    hosted-engine --vm-shutdown
3. host

2.      selfhost     (          RHEVM VM        )
    3. rhevm VM      OS update
    4. install rhevm
    5. engine-setup

    6. service ovirt-engine stop
    7. engine-cleanup

    8. restore db
    su - postgres -c psql
    alter role engine encrypted password 'PASSWORD';
    engine-backup --mode=restore --scope=all --file=rhev3.6.backup --
log=restore.log --change-db-credentials --db-host=localhost --db-name=engine
--db-user=engine --db-password --restore-permissions

    9. engine-setup

    10. delete hosted_engine VM from db
    delete from snapshots where snapshot_id=(select snapshot_id from
snapshots where vm_id=(select vm_guid from vm_static where vm_name like
'HostedEngine'))
    delete from vm_static where vm_guid=(select vm_guid from vm_static where
vm_name like 'HostedEngine')

    11. manager UI    hosted_engine host              ->         ->
```

12. selfhost
