# Samba Anonymous

```
= yes          map to guest = Bad User   가          public
```

```
[global]
  workgroup = MYGROUP
  server string = Samba Server Version %v
  security = USER
  map to guest = Bad User
  log file = /var/log/samba/log.%m
  max log size = 50
  idmap config * : backend = tdb
  cups options = raw
[sharename]
  path = /chosen/path
  read only = No
  guest ok = Yes
  browseable = Yes
  public = Yes
```
