# SSH ( )

— 2016/09/22 15:39

## 1 : DNS

ssh 가 .  
 ssh 가 .  
 sshd 가 DNS .  
 .  
 1. /etc/ssh/sshd\_config .  
 2. UseDNS no . . . . .  
 yes . . . . .  
 no . . . . .  
 . . . . .  
 3. sshd . systemctl restart sshd .  
 4. ssh .

## 2 : GSSAPIAuthentication

ssh 가 . -v

```
$ ssh xx.xxxx.com -v
.....
debug1: Authentications that can continue: publickey,gssapi-with-mic,password
debug1: Next authentication method: gssapi-with-mic
debug1: Unspecified GSS failure. Minor code may provide more information
Credentials cache file '/tmp/krb5cc_1000' not found

debug1: Unspecified GSS failure. Minor code may provide more information
Credentials cache file '/tmp/krb5cc_1000' not found

debug1: Unspecified GSS failure. Minor code may provide more information

debug1: Next authentication method: publickey
debug1: Trying private key: /home/cherrykyun/.ssh/identity
debug1: Trying private key: /home/cherrykyun/.ssh/id_rsa
debug1: Trying private key: /home/cherrykyun/.ssh/id_dsa
debug1: Next authentication method: password
```

```
ssh_

04:31
```

- (sshd\_config)
- (ssh\_config)

GSSAPIAuthentication

가

가

가

/etc/ssh/sshd\_config "GSSAPIAuthentication no"

```
.....
# GSSAPI options

#      no
GSSAPIAuthentication no
#GSSAPIAuthentication yes

#GSSAPICleanupCredentials yes
GSSAPICleanupCredentials yes
#GSSAPIStrictAcceptorCheck yes
#GSSAPIKeyExchange no
.....
```

/etc/ssh/ssh\_config

```
Host *
      GSSAPIAuthentication yes #      no
```

ssh

```
# service sshd restart
```
